

Diagram illustrating the relationship between TEE (Trusted Execution Environment) and TPM (Trusted Platform Module) components within a CPU context.

The diagram shows a large light gray rectangle representing the CPU. Inside this rectangle, there is a smaller light gray rectangle. Within this inner rectangle, the text "TEE" is on the left and an orange square with a dashed border is on the right. The text "TPM" is centered inside the orange square. Below the inner rectangle, the text "CPU" is centered within the large rectangle.
